

Results of ICP-OES analyses of the TVA ash spill samples collected 12-27-08 from the Emory River

Samples collected by Donna Lisenby (Appalachian Voices/Watauga Riverkeeper) and analyzed by Shea Tuberty, PhD and Carol Babyak, PhD (Appalachian State University)

| Element | N=3 | Water Samples | | | Sediment | TN Water Quality Standards (mg/L or ppm) | | |
|------------|---------|---------------------|--------------|--------------|-----------|---------------------------------------------|-------|-----------------------------------------------------|

not detected = no levels were found at the limits of our analytical instrumentation

n/a = there are no regulated levels of these elements in drinking water

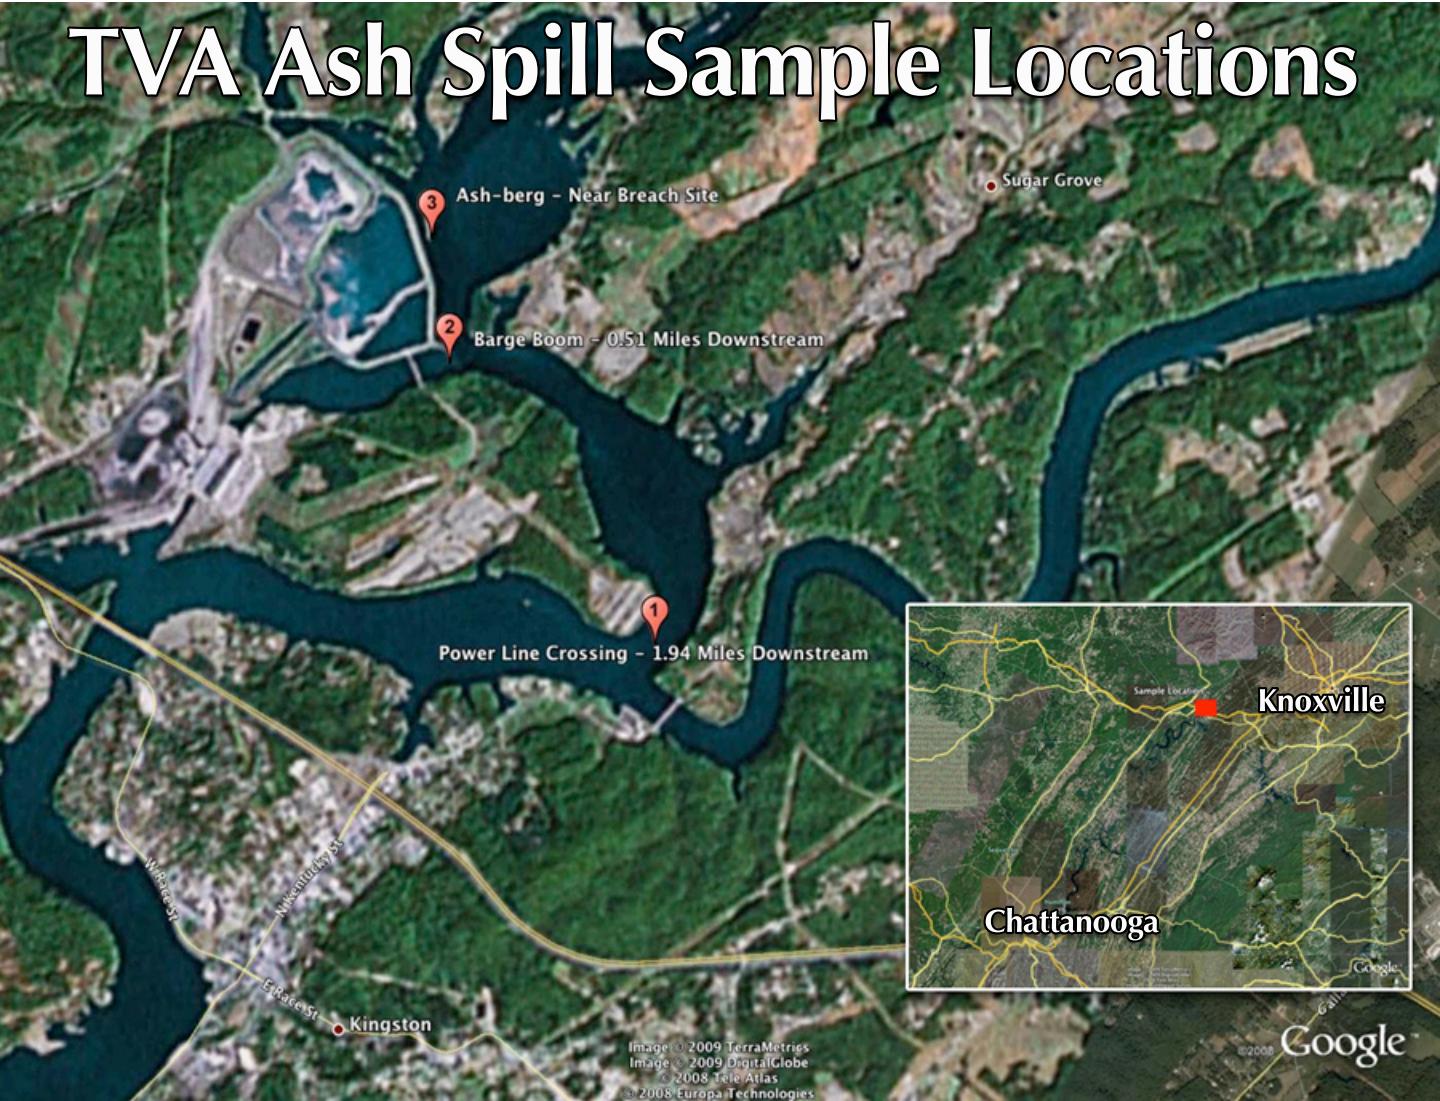

*Fish and Aquatic criteria are speciated into Co III and Co IV but samples are not speciated

 Sample exceeds one or more TN water quality criteria

 Description of domestic drinking water criteria exceedence

 Description of fish and aquatic criteria exceedence

TVA Ash Spill Sample Locations

Results of ICP-OES analyses of the TVA ash spill samples collected 12-27-08 from the Emory River

Samples collected by Donna Lisenby (Appalachian Voices/Watauga Riverkeeper)

Samples analyzed by Professor Shea Tuberty, PhD and Professor Carol Babyak, PhD - Appalachian State University

Each field sample was used to prepare 3 replicate samples for analyses, means and standard deviations were calculated from these three replicates
